I-95 Improvements with Express Toll Lanes

SAFETY IMPROVEMENTS:

- Reduced traffic congestion-five travel lanes versus previous three at the interchange.
- Eliminated left exits onto I-695 & I-95 reducing weaving/accidents on I-95.
- Replaced bridges & culverts in varying states of disrepair.
- Constructed fully directional ramps for high-volume traffic & highway speed traffic movements.
- Improved highway lighting along I-95 and at all ramp entry and exit points.
- Installed new directional and informational signing.
- Improved pavement with inlaid pavement markings and raised pavement markers.
- Upgraded Intelligent Transportation Systems (ITS), including traffic cameras and dynamic message signs (DMS).
