

HATEM BRIDGE RE-DECKING CONSTRUCTION

The Hatem Bridge has been experiencing concrete deck and barrier deterioration. This has resulted in weekly lane closures for maintenance. The proposed construction will provide a safer bridge for all users and reduce the delays due to periodic lane closures.

- **Project Schedule**
 - Fall 2007 through Fall 2010
- **Traffic Control During Construction**
 - The improvements will be completed in three major steps. One lane of traffic will be maintained in each direction.
