MEMORANDUM

TO: Finance Committee

FROM: Allen Garman, Director of Treasury and Debt **SUBJECT:** PFC Bonds Refinancing Board Resolution 23-01

DATE: May 11, 2023

PURPOSE OF MEMORANDUM

Request recommendation to move forward to the full MDTA Board for approval of Board Resolution 23-01 to authorize the issuance of BWI Passenger Facility Charge (PFC) revenue bonds or alternative financing options (bank loan) to refinance portions of the Series 2012 and 2014 bonds for economic savings, apply cash from the PFC Facility Improvement Fund to reduce principal outstanding, and introduce a springing amendment to the PFC Trust that will change the issuer to MDOT from the MDTA.

SUMMARY

The PFC airport bonds are non-recourse to the MDTA and are issued for the Maryland Department of Transportation, Maryland Aviation Administration (MDOT MAA) to finance projects at the Baltimore Washington International Marshall Airport (BWI Marshall Airport).

Resolution 23-01 authorizes:

- 1. \$100 million of bonds to refinance the PFC Series 2012 A/B and 2014 bonds for economic savings and refinance the Series 2012 C variable rate bonds to fixed rate.
- 2. Application of up to \$40 million in the PFC Facility Improvement Fund to reduce principal outstanding.
- 3. PFC Trust Agreement springing amendment to change the issuer to MDOT from the MDTA, with an expected effective date around June 1, 2029.

Of the \$241 million in Series 2012/2014/2019 PFC bonds currently outstanding, a combined \$128 million of the Series 2012 A/B/C and 2014 bonds are currently callable or will be callable on 6/1/23. Per IRS rules, *current refunding* bonds may be issued up to 90-days before the call date.

1. Refinancing Savings

Anticipated savings of approximately \$2.8 million for the Series 2012A and 2014 refinancing component will be realized over an eleven-year period. Importantly, the resolution sets a minimum \$1 million Net Present Value savings threshold for the fixed-rate aggregate refinancings (Series 2012A, 2012B, 2014) and prohibits any single fixed-rate maturity refinancing unless it is individually economic.

2. Cash Defeasance Component

Portion of PFC Improvement Fund that is not needed near term for the PFC capital program will be utilized to reduce principal outstanding, which lowers net carryings costs and improves debt service coverage.

3. Springing Amendment PFC Trust Agreement

As a function of its financing authority granted in legislation, the MDTA served as the nonrecourse or conduit bond issuer (not obligor) since the inception of the PFC financing program and trust. In recent years, MDOT has been granted conduit financing authority. From a functional reporting lines perspective between MAA and MDOT, it is now administratively appropriate to convert the issuer to MDOT from the MDTA. This issuer change will be accomplished in several years through a springing amendment that becomes effective when supplemental trusts accompanying each new financing effectively vote in favor of the amendment. The amendment will spring into effect when the new *consenting* bondholders are greater than the *legacy* bondholders. This greater than 50% majority threshold is expected to be reached by 6/1/29 or sooner with additional refinancings or new money issuances.

The Executive Director and Chief Financial Officer (CFO) will have the authority to manage the bond sale and closing, including the award of the 2023 bonds to the successful underwriting firm(s) or negotiation of terms for a private placement. The resolution also provides for authority to select other service providers and to prepare and execute all closing documents, certificates, and bond forms.

NOW, THEREFORE, BE IT RESOLVED BY THE MARYLAND TRANSPORTATION AUTHORITY, as follows:

Section 1. The MDTA hereby authorizes the issuance of one or more series of PFC Bonds designated as its "Passenger Facility Charge Revenue Refunding Bonds, Series 2023, Baltimore/Washington International Thurgood Marshall Airport (Qualified Airport Bonds-AMT)," or such other or further designation as may be deemed appropriate by the Executive Director, in a total aggregate principal amount not to exceed One Hundred Million Dollars (\$100,000,000), for the purpose of (i) refunding all or a portion of the Outstanding Prior Bonds or all or a portion of any principal maturities thereof, provided that the savings realized from the refunding results in aggregate net present value savings to the MDTA of not less than One Million Dollars (\$1,000,000) and that no single fixed-rate maturity will be refinanced unless economic, (ii) funding a debt service reserve fund and (iii) paying the costs related to the issuance of the Series 2023 PFC Bonds, subject to the limitations set forth below in Section 3(b).

Section 2. The Series 2023 PFC Bonds will be issuable as fully registered bonds without coupons and may be issued in such denominations as the Executive Director may determine, in consultation with the Chief Financial Officer of the MDTA (the "Chief Financial Officer"), the Chief Financial Officer to the Maryland Department of Transportation (the "Department CFO"), the Chief Financial Officer of MDOT MAA (the "MAA CFO"), and the financial advisors and bond counsel to the MDTA, as appropriate. - Matched Funding Accounts: Policy and Trust Agreement Directives/Limitations
 - o <u>Capital (Pay-Go & Bond Proceeds)</u>, <u>Operating & Debt Service Accounts</u> Investment maturities precede or coincide with expected spending.

Returns: Investment returns are a function of prevailing interest rates for short-term investments such as Money Market Mutual Funds, MLGIP, Agency/Supranational Discount Notes, and Commercial Paper.

- **Total Return Accounts:** Board Approved Benchmarks
 - o <u>M&O Reserve</u> Staggered maturities, 0-15 years
 - o General Account Staggered maturities, 0-5-years

Returns: Longer duration indices benefit from higher average annual returns over multiyear periods and experience greater return volatility associated with mark-to-market relative to shorter-term duration indices.

 Investment maturities structured to precede projected spending immunizes portfolio against interest rate risk. Secondary goal to minimize net carrying cost of debt.

Capital Account – Net Operating Revenues (monthly) and Bond Proceeds (episodically) flow into the account, requiring short-term investments matched to projected capital spending.

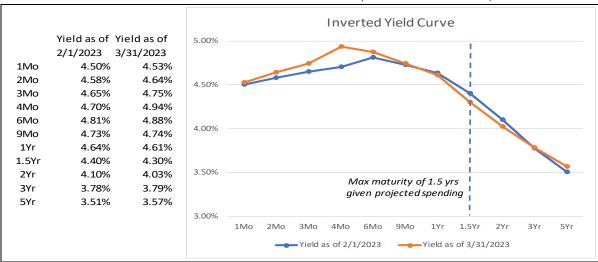

- Loan draw of \$200 million occurred 2/1/23, investments made on 2/2/23.

Continued Acceptance of Increased Mark-to-Market Swings in Exchange for Higher Average Annual Returns

- \$350M unencumbered/unrestricted cash policy
 - Stable target regardless of bond market conditions
 - Negative return temporarily reduces cash balance
- Benchmarks approved by Board based on risk tolerance to remain within financial policies and achieve reasonable multiyear returns
 - Longer duration and increased volatility accepted for M&O Reserve Account¹
 - 14% of Total Return accounts

Note 1: Composite of 1-13 year Treasury Strip indices approximates the effective duration of a laddered portfolio of 0-15-year coupon bearing securities and aligns with chosen strategy.

Note 2: See Supplemental information for further information on multi-year perspective.

Relative Value & Benchmark Implications

The securities contained in the current benchmark indices consist of U.S. Treasury and Government Agency debentures. MDTA's allocation to other sectors such as Supranational, Municipal, and Commercial Paper may help performance over time, but may cause tracking errors relative to the indices.

Supranational

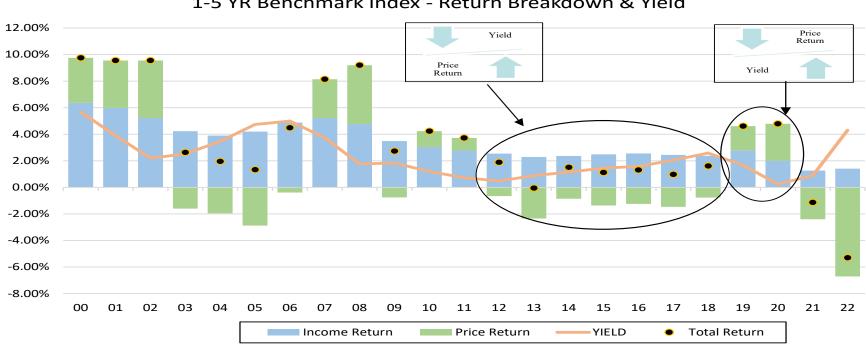

- > Supranational bonds were added to the Investment Policy in December 2016, with a sector limitation of 30% and a single issuer limitation of 10%.
- At times, Triple-A rated Supranational bonds, such as the World Bank, offer relative value versus comparable maturity agency debentures. Target spreads are approximately 10-15 basis points over comparable maturity agencies.

Municipal

- Municipal bonds are limited by policy to 20% of the portfolio, with a single issuer limitation of 5%.
- Triple-A taxable bonds are sought with spreads near 20 basis points relative to comparable maturity agencies.
- Municipals defeased with treasury securities are not subject to the policy limitation, as they are considered government securities. Target spreads are approximately 15 basis points over comparable maturity agencies.

Commercial Paper

- > CP is limited by policy to 20% of the portfolio, with a single issuer limitation of 5%.
- Three-month Tier-1 rated CP offered a 37 bp premium to agencies at the end of the quarter.

1-5 YR Benchmark Index - Return Breakdown & Yield

Total Kelurn portionos require:

- A long-term (multiyear) average annual return perspective to smooth out short-term volatility
 - Over long-term, duration targeted portfolio returns tend to converge back towards the starting rolling yield (multiyear returns \approx beginning period yields at purchase)

Income Return	=	Coupon Income
Price Return	=	Mark-to-market price changes
Yield	=	Prevailing market rates
Total Return (single years)	=	Income Return +/- Price Return

- Discipline to remain committed to strategies adopted based on risk tolerance
 - Shifting strategies during downturns results in missed opportunities for subsequent gains
 - Higher relative yields and decades of data demonstrate higher multiyear average returns for longer duration portfolios

MEMORANDUM

TO: Finance Committee

FROM: Jeffrey Brown, Director of Budget

SUBJECT: FY 2023 Operating Budget vs. Actual Spending Review

DATE: May 11, 2023

PURPOSE

The purpose of the memorandum is to advise the Finance Committee of the status of actual year-to-date (YTD) spending for the third quarter against the FY 2023 Final Operating Budget.

KEY TAKEAWAYS

Key takeaways regarding actual YTD spending against the FY 2023 Final Operating Budget:

- As of March 31, 2023, 64% of the budget was spent compared to a target of 72%.
- Object 06 (Fuel & Utilities) was above budget at an 82% spend rate, due, in part, to the delayed receipt and payment of utility invoices.
- Object 13 (Fixed Charges) was above budget at a 134% spend rate due to the payment of an annual insurance fee plus bad debt expenses associated with facility damage.
- All other Objects are at or below the targeted spending level.
- The primary underspending drivers are as follows: personnel vacancies, reduced vehicle purchases (shifting to FY2024), and other reduced line items spending.

SUMMARY

Budget analysis threshold: More than \$500,000 budgeted with variances greater than +/- 5% of the targeted spending level.

• Salaries & Wages/Technical & Special Fees (Object 01 & 02) are below budget with a 66% spend rate when compared to the projected spend rate (72%). Employee vacancies account for the lower than expected spend rate in Objects 01 & 02.

- Communications (Object 03) is at budget with a 73% spend rate.
 - Telecommunications (0303) is below budget at a 41% spend rate, which is mostly driven by employee vacancies.
 - State Paid Telecommunications (0305) is at a 92% spend rate and accounts for most of the performance in Object 03. This line item contains the State Radio System (\$1.7 million budgeted compared to \$1.6 million actual invoice) that is invoiced once per year.
- Object 4 (Travel) is below the budgeted spend rate at a 39% spend rate. The timing of activities (e.g., trainings, conferences, meetings) accounts for this performance.
- Fuel and Utilities (Object 06) are above the budgeted spend rate at an 82% spend rate. This is due, in part, to the fact that Object 06 activity is typically heavier during the third quarter of the fiscal year. Additionally, delayed billing from FY 2022 (that was not captured in the fiscal year-end accrual) has caused this line item to exceed the targeted spending level. While the delayed invoicing has since been remedied, this line item is projected to exceed the budget.
- Motor vehicle operations and maintenance (Object 07) is below budget at a 48% spend rate. The cost is largely dependent upon when vehicle orders are filled. Delays in orders are expected to result in savings for FY 2023. However, these costs will transfer into FY 2024. Additionally, gas prices are below budgeted assumptions and maintenance costs are lower due to warranty coverage on new vehicles.
- Contractual Services (Object 08) is below budget target with a 61% spend rate. Significant spending variances include:
 - Advertising (0801) is at a 32% spend rate. Some of the underspending in this line item is due to the timing of invoices and activity – this is expected to be at or potentially below budget.
 - o Engineers (0807) is at a 44% spend rate this is a seasonal item that is expected to be on budget.
 - o Equipment Rental (0808) is below budget at a 58% spend rate due to timing of the rental activity. There is the potential for small savings.
 - Equipment Repairs & Maintenance (0809) is over the targeted spend rate at a 92% spend rate. This is a timing issue driven by the one-time IT storage and blade service maintenance cost, which is on budget.
 - o Building/Road Repairs & Maintenance (0812) is below budget at a 46%. This line item is expected to be below budget due to reduced cost for dehumidification at the Bay Bridge and as sludge removal activity is moved to FY 2024.
 - Education & Training (0819) is below budget with a 34% spend rate. Expenses do
 not occur evenly throughout the year. For instance, tuition reimbursement follows
 the college semester timeline. However, savings is expected in this line item due
 to reduced Career Development Program activity.

FY 2023 Operating Budget vs. Actual Spending Review Page Three

- o Management Studies (0821) is below budget with a 21% spend rate. Savings is expected in this line item as some of the budgeted activities will shift to FY 2024.
- Security Services (0823) is at a 64% spend rate. This is expected to be on budget as the variance is due to invoice timing.
- o Fiscal Services (0829) is at a 62% spend rate. This line item is slightly below the targeted spending level and is expected to be on budget.
- The primarily IT objects (0841 through 0869) are collectively at a 59% spend rate compared to the budget. Typically, these objects have one-time invoicing, which results in expenses being above or below budget at specific times throughout the year, but ultimately on budget by year end. This line item is expected to be on budget with the potential for savings.
- o *E-ZPass*® Service Center Costs (0873) is at a 78% spend rate. Based on the latest expenditure forecast, this line item will exceed the budget.
- Other Contractual Services (0899) is at a 51% spend rate. This is driven by MSP invoicing. This line item is expected to be on budget.
- Supplies & Materials (Object 09) is at a 54% spend rate.
 - o Roadway Maintenance Materials (0905) is at a 41% spend rate this is a seasonal item that is expected to be on budget or slightly below budget.
 - o Salt (0906) is at 0.2% spend rate due to the mild winter to date. Savings are expected in this line item.
 - O Uniforms (0912) is at a 53% spend rate. Shipments are expected and will result in this line item being on budget.
 - Ammunition (0934) is at a 77% spend rate. The annual taser contract payment (\$312k) accounts for most of the variance.
- Replacement Equipment (Object 10) is below budget at a 58% spend rate.
 - Other Replacement Equipment (1099) drives the variance with a 67% spend rate.
 Replacement PPE equipment was received, and this line item is expected to be on budget.
- Additional Equipment (Object 11) is at a 14% spend rate.
 - Additional Maintenance & Building Equipment (1113) drives the variance with a 3% spend rate. FY 2023 expenses for a heavy truck lift delivery at the Nice/Middleton Bridge are expected to shift to FY 2024 due to an auto-shop renovation.
- Fixed Costs (Object 13) is over budget at a 134% spend rate.

Insurance (1309) is at a 133% spend rate. The increase is due to an annual invoice for the Bridge's & Tunnels Liability insurance. Also, bad debt expense (non-payment for damage to facilities) drives the variance in this line item.

MEMORANDUM

TO: MDTA Finance Committee

FROM: Assistant Capital Program Manager Jennifer Stump

SUBJECT: Third Quarter Review of FY 2023 Capital Budget vs. Actual Spending

DATE: May 11, 2023

PURPOSE OF MEMORANDUM

The purpose of the memorandum is to update the MDTA Finance Committee on the status of actual FY 2023 capital spending against the FY 2023 capital budget in the FY 2023-2028 Draft Consolidated Transportation Program (CTP). This information will be presented to the MDTA Board on May 25, 2023.

SUMMARY

As of March 31, 2023, 54.6% of the FY 2023 budget was spent as compared to the targeted spending level of 75%. The total budget for FY 2023 is \$556.0 million. The actual spending through the third quarter was \$303.4 million.

ANALYSIS

Twenty-six of the 91 projects budgeted in FY 2023 were within the acceptable spending limits of 50% to 100% (plus or minus 25% of the 75% target). Due to normal lags in invoicing, generally two months, a plus or minus 25% threshold was determined to be reasonable.

Actual spending through the third quarter for ten projects budgeted for more than \$11 million each in FY 2023 was \$223.0 million. The ten projects are detailed in Attachment A.

MEMORANDUM

TO: MDTA Finance Committee

FROM: Cheryl Lewis-Orr, Director of Revenue

SUBJECT: Third Quarter Fiscal Year 2023 Traffic and Revenue Performance

DATE: May 11, 2023

PURPOSE OF MEMORANDUM

To provide the Maryland Transportation Authority (MDTA) Finance Committee with a quarterly and year-to-date update regarding traffic and toll revenue trends compared to the previous year and the forecast.

KEY TAKEAWAYS

- Passenger vehicle traffic levels continue to track closely to pre-pandemic levels.
- Commercial vehicle traffic levels continue to outperform pre-pandemic levels.
- Systemwide, transactions and revenue exceed the forecast by 5.1% and 11.0%, respectively. When adjusting for timing differences, systemwide revenue exceeds the forecast by 6.9%.

ANALYSIS

Each quarter, an independent quarterly review of traffic and revenue is prepared by CDM Smith, Inc. (MDTA's traffic and revenue consultant). The quarterly review looks at traffic and toll revenue trends and compares actual system-wide experience with traffic and toll revenue forecasts. CDM Smith continues to track and evaluate the performance of traffic at the lane level and traffic and revenue collected on a cash basis.

*Note: Numbers may not sum due to rounding

As shown in the Table above, for the period ended March 31, 2023, year-to-date (YTD) systemwide transactions totaled 121.8 million and corresponding collected revenue totaled \$586.3 million. This represents a decrease of 4.6 million transactions, or a 3.6% decrease, compared to the same period last year. Similarly, YTD revenue decreased by \$15.4 million, or 2.6% compared to the same period last year. During the third quarter of FY 2023, transactions decreased by 7.4 million, or 17.2%, compared to the same period last year, and revenue decreased by \$38.7 million, or 17.9%. The variation in collected transactions and revenue are mainly due to the transaction backlog. Both *E-ZPass*® (Electronic Toll Collection) and video toll transactions were processed at higher rates during the third quarter of FY 2022. Transaction processing is expected to stabilize in the coming fiscal year.

For the period ended March 31, 2023, actual YTD transactions were above forecast by 5.9 million, or 5.1%, and revenue was above forecast by \$57.9 million, or 11.0%. After adjusting for timing differences (*i.e.*, more days of AVI and I-toll transactions processed than forecasted as well as NOTD mailings compared to the forecast), revenue exceeded the forecast by \$36.2 million, or 6.9%. The \$36.2 million deviation in actual revenue performance compared to the forecast is due to multiple factors, including processing transactions from FY 2021 and FY 2022 that were not included in the forecast, higher than forecasted Pay-by-Plate usage, and higher than forecasted *E-ZPass*® transactions and Administrative Toll revenue.

Subject: FINAL Third Quarter Fiscal Year 2023 Traffic and Revenue Performance Report

Dear Ms. Sharpless:

This letter report provides a summary of historical monthly transaction and toll revenue performance on the MDTA system using available data through the third quarter of Fiscal Year (FY) 2023, ending March 31, 2023. The historical performance is also compared to the most recent forecast developed by CDM Smith and summarized in the "FY 2023 Traffic and Toll Revenue Forecast Update", (November 2022 forecast report) dated November 2, 2022. This comparison is provided separately for the Legacy system, Intercounty Connector (ICC), and I -95 Express Toll Lanes (ETLs), as well as for the total system. An analysis of the variations in actual experience compared to forecast is also provided.

Recent Trends

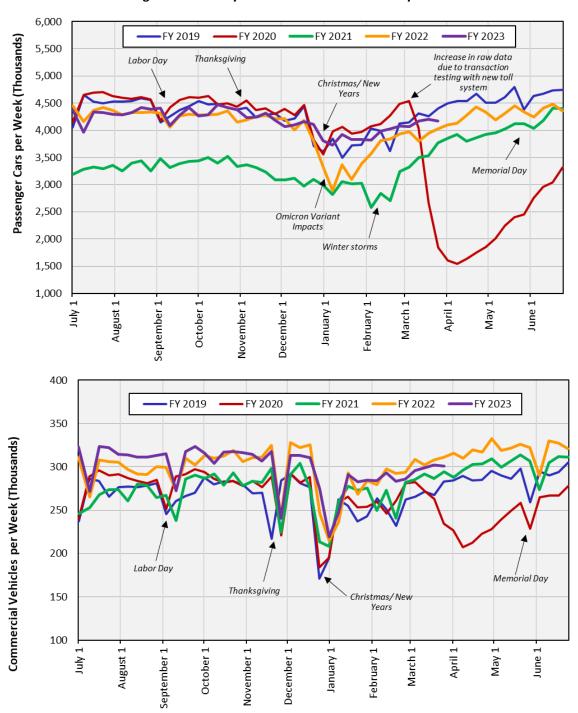

Similar to FY 2022, FY 2023 transactions and revenue have been impacted by recovery from the COVID-19 pandemic and the customer focused business rule changes implemented by MDTA during that timeframe. Due to this, CDM Smith has continued to track the performance on the system through two sources: the Kapsch 3G toll collection system data reports and the Traffic Volume Income (TVI) reports. The 3G reports provide the raw, in-lane data which records the daily traffic at the roadside, independent of toll collections. TVI reports provide collected transactions and revenue on the system on a cash basis, where a transaction and the associated revenue is reported in the month the toll is paid.

Figure 1 shows the systemwide traffic on the total MDTA system for passenger cars and commercial vehicles from July 2019 through March 2023, using the daily in-lane data. Traffic volumes in the first half of FY 2022 were close to FY 2019 levels but softened during the second half of FY 2022 due to the impacts of the Omicron variant in January, followed by the impacts of high fuel prices and inflation. Passenger car transaction volumes for FY 2023 YTD were similar to FY 2022 in both volume and weekly variation and have not yet returned to pre-pandemic levels. Passenger cars reached very close to FY 2019 levels in February and March. Commercial vehicle traffic continues to outperform traffic trends observed prior to the pandemic. Through the third quarter of FY 2023, commercial vehicles mostly remained at or slightly above FY 2022 levels. This indicates a flattening of commercial vehicle growth post-pandemic, which was anticipated due to the unsustainable high growth seen in recent years.

FINAL

Monthly transactions for FY 2022 and FY 2023 for the total system are presented in **Table 1** by vehicle type and payment method. This table and the remaining tables in this report will present TVI report data and represent transactions and associated revenue in the month the toll is paid. Significant monthly variations can be observed in transaction totals, and the distribution of transactions by payment method. These variations are the result of the timing of transaction processing in the back office, and not reflective of variations in traffic on MDTA system facilities. Total passenger car transactions for the first quarter in FY 2023 were nearly equal to the same period in 2022, whereas second quarter transactions in FY 2023 were 7.3 percent higher. This change in trend was largely due to the impending termination of the customer assistance plan, which resulted in a 108.0 percent year-over-year increase in video transactions for the month of November. Third quarter FY 2023 passenger cars were 17.4 percent lower over the year prior due largely to January and February which decreased by 19.3 and 34.2 percent, respectively. Both ETC and video backlog transactions were being processed at higher rates leading up to the third quarter of FY 2022, causing the large reductions year-over-year. The reduction in the number of backlog transactions being paid throughout the fiscal year will cause these reductions, but this is expected to stabilize in the coming fiscal year. Commercial vehicle transaction in the third quarter were 13.9 percent lower than FY 2022, once again due to a large decrease in the share of backlog transactions being paid year-over-year. Overall, total system transactions in Q3 2023 were 17.2 percent lower than 2022, yielding a decrease of 3.6 percent for FY 2023 YTD over the same period in 2022.

Monthly collected toll revenue for FY 2022 and FY 2023 for the total system are provided in **Table 2**. **Figure 2** is a graphical depiction of the share of toll revenue by method of payment and vehicle class for the same period. Systemwide toll revenue trends for passenger cars were up 4.0 percent in the first quarter of FY 2023 and 10.5 percent in the second quarter of FY 2023 over the same period in FY 2022. In the third quarter of FY 2023, systemwide passenger car revenue was 23.6 percent down over the prior year. Revenue for commercial vehicles followed a similar trend and were up by 2.0 percent and 11.3 percent, respectively, for the first and second quarters, and down by 12.3 percent in the third quarter of FY 2023. Overall, third quarter FY 2023 revenue decreased 19.6 percent compared with Q3 FY 2022, yielding a decrease of 2.4 percent for FY 2023 YTD over 2022.

Lastly, **Table 3** provides the same monthly trend comparison for other revenue. Other revenue is non-toll revenue collected by the agency that is associated with operations. This revenue comes from unused commuter and shopper plan trips, E-ZPass transponder sales, Hatem E-ZPass programs, civil penalties from violation recovery, and commercial vehicle fees and discounts. The commercial vehicle revenue comes from post-usage discounts, high frequency discounts, and oversize permit fees. Since this revenue is associated with collected transactions and revenue, and therefore the delayed NOTDs, year-over-year trends vary greatly on a monthly basis. Overall, other revenue increased by 9.5 percent for the third quarter of FY 2023 but decreased by 5.5 percent for FY 2023 YTD when compared to the same period the year prior. This is primarily the result of decreases in violation recovery in the first and second quarters due to the customer assistance plan.

Forecast Versus Actual

In this section, actual collected transactions and revenue are compared to the November 2022 forecast for each of the facilities. **Table 4** provides the comparison for the Legacy System transactions by vehicle type and method of payment and **Table 5** shows the same comparison for collected toll revenue. As shown in Table 4, total transactions were 5.8 percent above forecast in the first quarter and 15.1 percent above forecast in the second quarter. In the third quarter, total transactions were 4.0 percent above forecast. Passenger cars were 4.0 percent above forecast and commercial vehicles were 3.4 percent below forecast in the third quarter.

In the first and second quarters of FY 2023, variations occurred due to timing of back office processing and the impending termination of the customer assistance program. In the third quarter, ETC transactions continued to outperform forecast for both passenger cars and commercial vehicles while video transactions underperformed at similar rates top the first quarter. The underperformance in video transactions is in part due to variation in collection rates from those assumed in the forecast. Video collection trends will continue to vary as the backlog transactions are paid and will be closely monitored moving forward.

⁽²⁾ Violation recovery is civil penalties collected on unpaid notices of toll due.

⁽³⁾ Commercial vehicles include post-usage discounts, high frequency discounts, and oversize permit fees.

FINAL

As shown in Table 5, collected toll revenue on the Legacy System showed similar trends versus forecast as those seen in transactions, including significant variations in monthly totals and distribution by payment method. Passenger car revenue was 3.6 percent above forecast for the third quarter, and commercial vehicle revenue exceeded forecast by 5.6 percent. Total Legacy system collected toll revenue for the third quarter of FY 2023 was 4.4 percent above forecast. Overall, FY 2023 YTD collected revenue totals were 9.1 percent above forecast. This is, in part, due to the timing of paid video transactions deviating from forecast, and a higher number of ETC transactions with higher than forecasted toll rates. The higher toll rates are caused by an increased share of out-of-state and non-commuter in-state ETC transactions than was anticipated in the forecast.

Table 6 provides the comparison for trips and collected toll revenue on the ICC by method of payment. The ICC trended similarly to the Legacy system with trips and revenue. As shown, FY 2023 third quarter trips were 1.3 percent below forecast and collected revenue was 10.3 percent above forecast. This is largely due to the video collection trend in January and March, and strong ETC toll revenue in January. The difference in impacts between transactions and revenue indicates there may be more full corridor or longer distance trips which pay a higher average toll than was forecasted.

Table 7 shows the comparison for total transactions and collected toll revenue for the I-95 ETLs. I-95 ETL transactions and revenue in the third quarter of FY 2023 were below forecast by 24.9 and 16.0 percent, respectively. This amounts to a negative forecast variance of approximately 1.4 million transactions and \$1.3 million for FY 2023 YTD. The deviation of actual transactions from forecast is in part due to raw in-lane traffic remaining unchanged in the second and third quarters of FY 2023 over the same period in FY 2022, which deviates from the assumption in the forecast.

Table 8 provides a comparison for the total MDTA system transactions and revenue, including all facilities and other revenue. When considering the systemwide performance, transactions in the third quarter were above forecast by 0.8 percent. The associated collected toll and other revenue in the third quarter was 8.3 percent above forecast, in part due to overperformance in ETC toll revenue and civil penalty collections in FY 2023 YTD. The civil penalty collections outperformance was caused by transactions escalated to CCU prior to the customer assistance plan that were paid in FY 2023, as well as the resumption of civil penalty collections after the termination of the customer assistance plan. The forecast assumed there would be no civil penalty revenue collected in the first half of FY 2023 and collections would resume January 2023.
