

DRIVERS UPDATE

Effective Early December

The MDTA is modifying the traffic pattern on a portion of northbound I-895 and the I-895B approach spur (from MD 2) involving changes to travel lanes, pavement markings, and signing. These changes will make it easier for motorists on the northbound I-895B spur to merge onto mainline I-895 and will improve traffic flow during peak travel times.

- The ramp from the I-895B Spur (from I-97) will join I-895 NB as an added lane at mile marker 6.25

I-895B Spur entrance to I-895 northbound mainline

- Travel lanes on I-895 NB at mile marker 5.3 will be reduced from two lanes to one lane to accommodate the I-895B Spur ramp entrance as an added lane

I-895 north of MD 295
